We create chemistry

Safety data sheet

BASF Safety data sheet according to Regulation (EC) No. 1907/2006 as amended from time to time.
Date / Revised: 28.06.2018 Version: 1.1
Product: **PT Ultracide Pressurized Flea Insecticide**
(ID no. 30719162/SDS_CPA_EU/EN)
Date of print 08.07.2025

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

PT Ultracide Pressurized Flea Insecticide

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses: crop protection product, insecticide

1.3. Details of the supplier of the safety data sheet

Company:
BASF SE
67056 Ludwigshafen
GERMANY
Operating Division Crop Protection

Telephone: +49 621 60-27777
E-mail address: Produktinformation-Pflanzenschutz@basf.com

1.4. Emergency telephone number

International emergency number:
Telephone: +49 180 2273-112

SECTION 2: Hazards Identification

2.1. Classification of the substance or mixture

According to Regulation (EC) No 1272/2008 [CLP]

Asp. Tox. 1
Aquatic Acute 1
Aquatic Chronic 3

Aerosol 1

H222, H229, H304, H412, H400, EUH401

For the classifications not written out in full in this section the full text can be found in section 16.

2.2. Label elements

According to Regulation (EC) No 1272/2008 [CLP]

Pictogram:

Signal Word:
Danger

Hazard Statement:

H222	Extremely flammable aerosol.
H229	Pressurized container: May burst if heated.
H304	May be fatal if swallowed and enters airways.
H412	Harmful to aquatic life with long lasting effects.
H400	Very toxic to aquatic life.
EUH401	To avoid risks to human health and the environment, comply with the instructions for use.

Precautionary Statement:

P101	If medical advice is needed, have product container or label at hand.
P102	Keep out of reach of children.

Precautionary Statements (Prevention):

P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P211	Do not spray on an open flame or other ignition source.
P251	Do not pierce or burn, even after use.

Precautionary Statements (Response):

P301 + P310	IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P391	Collect spillage.
P331	Do NOT induce vomiting.

Precautionary Statements (Storage):

P410 + P412	Protect from sunlight. Do no expose to temperatures exceeding 50°C/ 122°F.
P405	Store locked up.

Precautionary Statements (Disposal):

P501	Dispose of contents/container to hazardous or special waste collection point.

Labeling of special preparations (GHS):
EUH208: May produce an allergic reaction. Contains: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
Restricted to professional users.

According to Regulation (EC) No 1272/2008 [CLP]

Hazard determining component(s) for labelling: Distillates (petroleum), hydrotreated light; Kerosine -- unspecified, Petroleum gases, liquefied, sweetened; Petroleum gas, permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate

2.3. Other hazards

According to Regulation (EC) No 1272/2008 [CLP]

See section 12 - Results of PBT and vPvB assessment.

If applicable information is provided in this section on other hazards which do not result in classification but which may contribute to the overall hazards of the substance or mixture.

SECTION 3: Composition/Information on Ingredients

3.1. Substances

Not applicable

3.2. Mixtures

Chemical nature

crop protection product, insecticide

Hazardous ingredients (GHS)
according to Regulation (EC) No. 1272/2008

permethrin (ISO); m-phenoxybenzyl 3-(2,2- dichlorovinyl)-2,2-dimethylcyclo-propanecarboxylate

Content (W/W): 0.4 %	Acute Tox. 4 (oral)
CAS Number: 52645-53-1	Acute Tox. 4 (Inhalation - mist)
	Skin Sens. 1
	Aquatic Acute 1
	Aquatic Chronic 1
	M-factor acute: 10000
	M-factor chronic: 1000
	H332, H302, H317, H400, H410

N-(2-Ethylhexyl)-8,9,10-trinorborn-5-ene-2,3-dicarboximide

Content (W/W): 0.4 %	Acute Tox. 4 (oral)
CAS Number: 113-48-4	Acute Tox. 3 (dermal)
EC-Number: 204-029-1	Aquatic Chronic 2
	H311, H302, H411

2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine

Content (W/W): 0.1 %	Aquatic Acute 1
CAS Number: 95737-68-1	Aquatic Chronic 1
INDEX-Number: 613-303-00-3	H400, H410

Pyrethrins and Pyrethroids

Content (W/W): 0.05 %	Acute Tox. 4 (Inhalation - vapour)
CAS Number: 8003-34-7	Acute Tox. 4 (oral)
EC-Number: 232-319-8	Acute Tox. 4 (dermal)
INDEX-Number: 613-022-00-6	Aquatic Acute 1
	Aquatic Chronic 1
	H312, H332, H302, H400, H410

Hydrocarbons, C11-C14, n-alkanes, isoalkanes, cyclics, <2% aromatics

Content (W/W): < 20 %	Asp. Tox. 1
CAS Number: 64742-47-8	H304
	EUH066

Petroleum gases, liquefied, sweetened

Content (W/W): < 20 %	Press. Gas Liquef. Gas
CAS Number: 68476-86-8	Flam. gases (incl. chem. unstable gases) 1
EC-Number: 270-705-8	H280, H220
INDEX-Number: 649-203-00-1	

For the classifications not written out in full in this section, including the hazard classes and the hazard statements, the full text is listed in section 16.

SECTION 4: First-Aid Measures

4.1. Description of first aid measures

Remove contaminated clothing.

If inhaled:
Keep patient calm, remove to fresh air.

On skin contact:
Wash thoroughly with soap and water.

On contact with eyes:
Wash affected eyes for at least 15 minutes under running water with eyelids held open.

On ingestion:
Immediately rinse mouth and then drink 200-300 ml of water, seek medical attention. Do not induce vomiting due to aspiration hazard.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms: The most important known symptoms and effects are described in the labelling (see section 2) and/or in section 11., Further important symptoms and effects are so far not known.

4.3. Indication of any immediate medical attention and special treatment needed

Treatment: Treat according to symptoms (decontamination, vital functions), no known specific antidote.

SECTION 5: Fire-Fighting Measures

5.1. Extinguishing media

Suitable extinguishing media:
foam, dry powder, carbon dioxide, water spray

5.2. Special hazards arising from the substance or mixture

carbon monoxide, Carbon dioxide, Hydrochloric acid, nitrogen oxides, halogenated hydrocarbons
The substances/groups of substances mentioned can be released in case of fire. Aerosol container contains flammable gas under pressure.

5.3. Advice for fire-fighters

Special protective equipment:
Wear self-contained breathing apparatus and chemical-protective clothing.

Further information:
Keep containers cool by spraying with water if exposed to fire. In case of fire and/or explosion do not breathe fumes. Collect contaminated extinguishing water separately, do not allow to reach sewage or effluent systems. Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

SECTION 6: Accidental Release Measures

6.1. Personal precautions, protective equipment and emergency procedures

Do not breathe vapour/spray. Use personal protective clothing. Avoid contact with the skin, eyes and clothing.

6.2. Environmental precautions

Do not discharge into the subsoil/soil. Do not discharge into drains/surface waters/groundwater.

6.3. Methods and material for containment and cleaning up

For small amounts: Pick up with suitable absorbent material (e.g. sand, sawdust, general-purpose binder, kieselguhr).
For large amounts: Dike spillage. Pump off product.
Dispose of absorbed material in accordance with regulations. Collect waste in suitable containers, which can be labeled and sealed. Clean contaminated floors and objects thoroughly with water and detergents, observing environmental regulations.

6.4. Reference to other sections

Information regarding exposure controls/personal protection and disposal considerations can be found in section 8 and 13.

SECTION 7: Handling and Storage

7.1. Precautions for safe handling

No special measures necessary if stored and handled correctly. Ensure thorough ventilation of stores and work areas. When using do not eat, drink or smoke. Hands and/or face should be washed before breaks and at the end of the shift.

Protection against fire and explosion:
Vapours may form ignitable mixture with air. Prevent electrostatic charge - sources of ignition should be kept well clear - fire extinguishers should be kept handy.

7.2. Conditions for safe storage, including any incompatibilities

Segregate from foods and animal feeds.
Further information on storage conditions: Keep away from heat. Protect from direct sunlight. Keep only in the original container in a cool, dry, well-ventilated place away from ignition sources, heat or flame.

Protect from temperatures above: 50 °C
The packed product must be protected against exceeding the indicated temperature.

7.3. Specific end use(s)

For the relevant identified use(s) listed in Section 1 the advice mentioned in this section 7 is to be observed.

SECTION 8: Exposure Controls/Personal Protection

8.1. Control parameters

Components with occupational exposure limits

52645-53-1: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
TWA value 1 mg/m3 (OEL (EU))
indicative
68476-86-8: Petroleum gases, liquefied, sweetened; Petroleum gas
64742-47-8: Distillates (petroleum), hydrotreated light; Kerosine -- unspecified

8.2. Exposure controls

Personal protective equipment

Respiratory protection:
Suitable respiratory protection for higher concentrations or long-term effect: Combination filter for gases/vapours of organic, inorganic, acid inorganic and alkaline compounds (e.g. EN 14387 Type ABEK).

Hand protection:
Suitable chemical resistant safety gloves (EN 374) also with prolonged, direct contact (Recommended: Protective index 6, corresponding > 480 minutes of permeation time according to EN 374): E.g. nitrile rubber (0.4 mm), chloroprene rubber (0.5 mm), butyl rubber (0.7 mm) etc.

Eye protection:
Safety glasses with side-shields (frame goggles) (e.g. EN 166)

Body protection:
Body protection must be chosen depending on activity and possible exposure, e.g. apron, protecting boots, chemical-protection suit (according to EN 14605 in case of splashes or EN ISO 13982 in case of dust).

General safety and hygiene measures
The statements on personal protective equipment in the instructions for use apply when handling crop-protection agents in final-consumer packing. Wearing of closed work clothing is recommended. Store work clothing separately. Keep away from food, drink and animal feeding stuffs.

SECTION 9: Physical and Chemical Properties

9.1. Information on basic physical and chemical properties

Form:	liquid, aerosol
Colour:	white
Odour:	characteristic

Odour threshold:	Not determined due to potential health hazard by inhalation.
pH value:	approx. 6 - 8 (23.7 °C) The product has not been tested. The statement has been derived from substances/products of a similar structure or composition.
Melting point:	approx. -30 °C Information applies to the solvent.
Boiling range:	approx. 193 - 245 °C Information applies to the solvent.
Flash point:	approx. -104 °C Information applies to the propellant.
Evaporation rate:	not applicable
Flammability:	Extremely flammable.
Lower explosion limit:	As a result of our experience with this product and our knowledge of its composition we do not expect any hazard as long as the product is used appropriately and in accordance with the intended use.
Upper explosion limit:	As a result of our experience with this product and our knowledge of its composition we do not expect any hazard as long as the product is used appropriately and in accordance with the intended use.
Ignition temperature:	approx. 220 - 250 °C Information applies to the solvent.
Vapour pressure:	approx. 0.19 - 0.3 hPa (20 °C) Information applies to the solvent.
Density:	approx. 0.93 g/cm3 (20 °C)
Relative vapour density (air):	not applicable
Solubility in water:	dispersible
Partitioning coefficient n-octanol/water (log Kow):	not applicable
Thermal decomposition:	No decomposition if stored and handled as prescribed/indicated.
Viscosity, dynamic:	not determined
Explosion hazard:	Based on the chemical structure there is no indicating of explosive properties.

Fire promoting properties: Based on its structural properties the product is not classified as oxidizing.

9.2. Other information

Other Information:
If necessary, information on other physical and chemical parameters is indicated in this section.

SECTION 10: Stability and Reactivity

10.1. Reactivity
No hazardous reactions if stored and handled as prescribed/indicated.

10.2. Chemical stability
The product is stable if stored and handled as prescribed/indicated.

10.3. Possibility of hazardous reactions
No hazardous reactions if stored and handled as prescribed/indicated.

10.4. Conditions to avoid
See MSDS section 7 - Handling and storage.

10.5. Incompatible materials

Substances to avoid:
strong acids, strong bases, strong oxidizing agents

10.6. Hazardous decomposition products

Hazardous decomposition products:
No hazardous decomposition products if stored and handled as prescribed/indicated.

SECTION 11: Toxicological Information

11.1. Information on toxicological effects

Acute toxicity

Assessment of acute toxicity:
The product has not been tested. The statement has been derived from the properties of the individual components.

Virtually nontoxic after a single ingestion. Virtually nontoxic by inhalation. Virtually nontoxic after a single skin contact.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate

Experimental/calculated data:
LD50 rat (oral): 448 mg/kg

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine

Experimental/calculated data:
LD50 rat (oral): > 5,000 mg/kg

Information on: pyrethrins including cinerins

Experimental/calculated data:
rat (oral): > 2,000 mg/kg
The European Union (EU) has classified this substance as 'harmful'.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
Experimental/calculated data:
LC50 rat (by inhalation): 2.3 mg/l
Literature data. Tested as dust aerosol.

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Experimental/calculated data:
LC50 rat (by inhalation): > 1,300 mg/l 4 h

Information on: pyrethrins including cinerins
Experimental/calculated data:
LC50 rat (by inhalation): > 2.02 mg/l 4 h
The European Union (EU) has classified this substance as 'harmful'.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
Experimental/calculated data:
LD50 rat (dermal): > 5,176 mg/kg

Information on: pyrethrins including cinerins
Experimental/calculated data:
LD50 rabbit (dermal): > 5,000 mg/kg
The European Union (EU) has classified this substance as 'harmful'.

Irritation

Assessment of irritating effects:
The product has not been tested. The statement has been derived from the properties of the individual components.

Not irritating to the skin. Not irritating to the eyes.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
Experimental/calculated data:
Skin corrosion/irritation rabbit: non-irritant

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Experimental/calculated data:
Skin corrosion/irritation rabbit: non-irritant

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
Experimental/calculated data:
Serious eye damage/irritation rabbit: non-irritant

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Experimental/calculated data:
Serious eye damage/irritation rabbit: non-irritant

Respiratory/Skin sensitization

Assessment of sensitization:
The product has not been tested. The statement has been derived from the properties of the individual components.

There is no evidence of a skin-sensitizing potential.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
Experimental/calculated data:
Stevens-Test / ZENECA guinea pig: skin sensitizing

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Experimental/calculated data:
guinea pig: Non-sensitizing.

Germ cell mutagenicity

Assessment of mutagenicity:
The product has not been tested. The statement has been derived from the properties of the individual components. Mutagenicity tests revealed no genotoxic potential.

Carcinogenicity

Assessment of carcinogenicity:

The product has not been tested. The statement has been derived from the properties of the individual components.

Information on: N-(2-Ethylhexyl)-8,9,10-trinorborn-5-ene-2,3-dicarboximide
Assessment of carcinogenicity:
In long-term animal studies in which the substance was given in high doses by feed, a carcinogenic effect was observed. The induction of tumors in animal studies was due to a reversible, nongenotoxic effect for which a threshold dose can be derived.

Reproductive toxicity

Assessment of reproduction toxicity:
The product has not been tested. The statement has been derived from the properties of the individual components. The results of animal studies gave no indication of a fertility impairing effect.

Developmental toxicity

Assessment of teratogenicity:
The product has not been tested. The statement has been derived from the properties of the individual components.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
Assessment of teratogenicity:
The substance did not cause malformations in animal studies. When given in high doses embryotoxicity was observed.

Specific target organ toxicity (single exposure)

Assessment of STOT single:
Based on the available information there is no specific target organ toxicity to be expected after a single exposure.

Remarks: The product has not been tested. The statement has been derived from the properties of the individual components.

Repeated dose toxicity and Specific target organ toxicity (repeated exposure)

Assessment of repeated dose toxicity:
The product has not been tested. The statement has been derived from the properties of the individual components.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
Assessment of repeated dose toxicity:
The substance may cause damage to the peripheral nervous system after repeated ingestion of high doses. The substance may cause damage to the peripheral nervous system after repeated skin contact with high doses.

Information on: N-(2-Ethylhexyl)-8,9,10-trinorborn-5-ene-2,3-dicarboximide
Assessment of repeated dose toxicity:
The substance may cause damage to the liver after repeated ingestion of high doses, as shown in animal studies.

Aspiration hazard

The product has not been tested. The statement has been derived from the properties of the individual components.
May also damage the lung at swallowing (aspiration hazard).

Other relevant toxicity information

Misuse can be harmful to health.

SECTION 12: Ecological Information

12.1. Toxicity

Assessment of aquatic toxicity:
Very toxic to aquatic life. Harmful to aquatic life with long lasting effects.
The product has not been tested. The statement has been derived from the properties of the individual components.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2- dichlorovinyl)-2,2-dimethylcyclo-propanecarboxylate
Toxicity to fish:
LC50 (96 h) 0.012 mg/l, Salmo salar

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Toxicity to fish:
LC50 (96 h) > 0.270 mg/l, Lepomis macrochirus

Information on: pyrethrins including cinerins
Toxicity to fish:
LC50 (96 h) 0.0052 mg/l, Oncorhynchus mykiss (static)

LC50 (96 h) 0.01 mg/l, Lepomis macrochirus

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2- dichlorovinyl)-2,2-dimethylcyclo-propanecarboxylate
Aquatic invertebrates:
EC50 (96 h) 0.000019 mg/l, Americamysis bahia

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Aquatic invertebrates:
LC50 (48 h) 0.4 mg/l, Daphnia magna (Flow through.)

Information on: pyrethrins including cinerins
Aquatic invertebrates:
EC50 (48 h) 0.012 mg/l, Daphnia magna

EC50 (48 h) 0.0014 mg/l, Mysidopsis bahia

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Aquatic plants:
EC50 (72 h) 0.15 mg/l, Pseudokirchneriella subcapitata

No observed effect concentration (7 d) 0.05 mg/l, Pseudokirchneriella subcapitata

Information on: pyrethrins including cinerins
Aquatic plants:
No toxic effects occur within the range of solubility.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2- dichlorovinyl)-2,2-dimethylcyclo-propanecarboxylate
Chronic toxicity to fish:
No observed effect concentration 0.0003 mg/l, Pimephales promelas

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Chronic toxicity to fish:
No observed effect concentration (95 d) 0.0043 mg/l, Oncorhynchus mykiss

Information on: pyrethrins including cinerins
Chronic toxicity to fish:
No observed effect concentration 0.0019 mg/l, Pimephales promelas
---

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2- dichlorovinyl)-2,2-dimethylcyclo-propanecarboxylate
Chronic toxicity to aquatic invertebrates:
No observed effect concentration (30 d) 0.000011 mg/l, Mysidopsis bahia

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Chronic toxicity to aquatic invertebrates:
No observed effect concentration (21 d) 0.00002 mg/l, Daphnia magna

Information on: pyrethrins including cinerins
Chronic toxicity to aquatic invertebrates:
No observed effect concentration (28 d) 0.00086 mg/l, Daphnia magna
---

12.2. Persistence and degradability

Assessment biodegradation and elimination (H2O):

The product has not been tested. The statement has been derived from the properties of the individual components.

Information on: permethrin (ISO); m-phenoxybenzyl 3-(2,2-dichlorovinyl)-2,2-dimethylcyclopropanecarboxylate
Assessment biodegradation and elimination (H2O):
Not readily biodegradable (by OECD criteria). Poorly biodegradable. Well eliminable from water by adsorption on activated sludge.

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Assessment biodegradation and elimination (H2O):
Not readily biodegradable (by OECD criteria).

Information on: pyrethrins including cinerins
Assessment biodegradation and elimination (H2O):
Not readily biodegradable (by OECD criteria).

12.3. Bioaccumulative potential

Assessment bioaccumulation potential:
The product has not been tested. The statement has been derived from the properties of the individual components.

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Assessment bioaccumulation potential:
Significant accumulation in organisms is not to be expected.

Information on: pyrethrins including cinerins
Assessment bioaccumulation potential:
Accumulation in organisms is not to be expected.

12.4. Mobility in soil

Assessment transport between environmental compartments:
Adsorption in soil: The product has not been tested. The statement has been derived from the properties of the individual components.

Information on: 2-(1-methyl-2-(4-phenoxyphenoxy)ethoxy)pyridine
Assessment transport between environmental compartments:
Adsorption in soil: Following exposure to soil, adsorption to solid soil particles is probable, therefore contamination of groundwater is not expected.

Information on: pyrethrins including cinerins
Assessment transport between environmental compartments:
Adsorption in soil: Following exposure to soil, adsorption to solid soil particles is probable, therefore contamination of groundwater is not expected.

12.5. Results of PBT and vPvB assessment

The product does not contain a substance fulfilling the PBT (persistent/bioaccumulative/toxic) criteria or the vPvB (very persistent/very bioaccumulative) criteria.

12.6. Other adverse effects

The product does not contain substances that are listed in Regulation (EC) 1005/2009 on substances that deplete the ozone layer.

12.7. Additional information

Other ecotoxicological advice:
Do not discharge product into the environment without control.

SECTION 13: Disposal Considerations

13.1. Waste treatment methods

Must be sent to a suitable incineration plant, observing local regulations.

Contaminated packaging:
Contaminated packaging should be emptied as far as possible and disposed of in the same manner as the substance/product.
Emptied gas pressure vessels must not be opened.

SECTION 14: Transport Information

Land transport

ADR

UN number	UN1950
UN proper shipping name:	AEROSOLS (contains ALKANES, PERMETHRIN)
Transport hazard class(es):	2.1, EHSM
Packing group:	Not applicable
Environmental hazards:	yes
Special precautions for user:	Tunnel code: D

RID

UN number	UN1950
UN proper shipping name:	AEROSOLS (contains ALKANES, PERMETHRIN)
Transport hazard class(es):	2.1, EHSM
Packing group:	Not applicable
Environmental hazards:	yes
Special precautions for	None known

Inland waterway transport

ADN

UN number	UN1950
UN proper shipping name:	AEROSOLS (contains ALKANES, PERMETHRIN)
Transport hazard class(es):	2.1, EHSM
Packing group:	Not applicable
Environmental hazards:	yes
Special precautions for user:	None known

Transport in inland waterway vessel

Not evaluated

Sea transport

IMDG

UN number:	UN 1950
UN proper shipping name:	AEROSOLS (contains ALKANES, PERMETHRIN)
Transport hazard class(es):	2.1, EHSM
Packing group:	Not applicable
Environmental hazards:	yes Marine pollutant: YES
Special precautions for user:	None known

Air transport

IATA/ICAO

UN number:	UN 1950
UN proper shipping name:	AEROSOLS, FLAMMABLE (contains ALKANES, PERMETHRIN)
Transport hazard class(es):	2.1
Packing group:	Not applicable
Environmental hazards:	No Mark as dangerous for the environment is needed
Special precautions for user:	None known

14.1. UN number

See corresponding entries for “UN number” for the respective regulations in the tables above.

14.2. UN proper shipping name

See corresponding entries for “UN proper shipping name” for the respective regulations in the tables above.

14.3. Transport hazard class(es)

See corresponding entries for “Transport hazard class(es)” for the respective regulations in the tables above.

14.4. Packing group

See corresponding entries for “Packing group” for the respective regulations in the tables above.

14.5. Environmental hazards

See corresponding entries for “Environmental hazards” for the respective regulations in the tables above.

14.6. Special precautions for user

See corresponding entries for “Special precautions for user” for the respective regulations in the tables above.

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Regulation:	Not evaluated
Shipment approved:	Not evaluated
Pollution name:	Not evaluated
Pollution category:	Not evaluated
Ship Type:	Not evaluated

SECTION 15: Regulatory Information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Prohibitions, Restrictions and Authorizations

Annex XVII of Regulation (EC) No 1907/2006: Number on List: 28, 29, 3

To avoid risks to man and the environment, comply with the instructions for use.

15.2. Chemical Safety Assessment

Advice on product handling can be found in sections 7 and 8 of this safety data sheet.

SECTION 16: Other Information

For proper and safe use of this product, please refer to the approval conditions laid down on the product label.

Full text of the classifications, including the hazard classes and the hazard statements, if mentioned in section 2 or 3:

Asp. Tox.	Aspiration hazard
Aquatic Acute	Hazardous to the aquatic environment - acute
Aquatic Chronic	Hazardous to the aquatic environment - chronic
Aerosol	Aerosols
Acute Tox.	Acute toxicity
Skin Sens.	Skin sensitization
Press. Gas	Gases under pressure
Flam. gases (incl. chem. unstable gases)	Flammable gases (including chemically unstable gases)
H222	Extremely flammable aerosol.
H229	Pressurized container: May burst if heated.
H304	May be fatal if swallowed and enters airways.
H412	Harmful to aquatic life with long lasting effects.
H400	Very toxic to aquatic life.
EUH401	To avoid risks to human health and the environment, comply with the instructions for use.
H332	Harmful if inhaled.
H302	Harmful if swallowed.
H317	May cause an allergic skin reaction.
H410	Very toxic to aquatic life with long lasting effects.
H311	Toxic in contact with skin.
H411	Toxic to aquatic life with long lasting effects.
H312	Harmful in contact with skin.
H280	Contains gas under pressure; may explode if heated.
H220	Extremely flammable gas.
EUH066	Repeated exposure may cause skin dryness or cracking.

The data contained in this safety data sheet are based on our current knowledge and experience and describe the product only with regard to safety requirements. This safety data sheet is neither a Certificate of Analysis (CoA) nor technical data sheet and shall not be mistaken for a specification agreement. Identified uses in this safety data sheet do neither represent an agreement on the corresponding contractual quality of the substance/mixture nor a contractually designated use. It is the responsibility of the recipient of the product to ensure any proprietary rights and existing laws and legislation are observed.
