

Foamaster® MO 2163

Emulsified defoamer with excellent price performance balance

Application:

Foamaster® MO 2163 is an emulsified defoamer, especially developed for decorative paints with mid-high PVC economic paints, texture and plasters.

Performance Highlights:

- Excellent economic emulsified defoamer
- Excellent defoaming and antifoaming across various PVC levels
- Good compatibility across various decorative paint binder systems
- Unique formulation which helps in easy incorporation into paint at different mixing speed
- Excellent storage stability
- Super low VOC / SVOC

Characteristic Values:

	Foamaster® MO 2163
Appearance:	Opaque white liquid
pH:	6.5 – 9.5
Density [g/cm ³]:	0.90 – 1.00
Viscosity [mPas]:	800 – 2500
