

Dispex[®] AA 4030

Product description Dispex[®] AA 4030 is an effective polymeric dispersing agent based on acrylic acid ammonium salt.

Chemical nature Ammonium acrylate

Properties

Physical form Yellowish liquid

Technical data

(not supply specification)

Solid content	DIN EN ISO 3251	29.0 – 31.0 %
pH value	DIN ISO 976	7.5 – 9.5
Flow time	DIN 53211 (Orifice 4 mm)	15 – 30 s
Iodine colour value	DIN EN 1557	≤ 3

Application

Dispex® AA 4030 is a polymeric dispersing agent for inorganic fillers and pigments. It is anionic, and it is supplied in the form of an ammonium salt.

Dispex® AA 4030 offers the following advantages:

- excellent dispersing efficiency for inorganic pigments and extenders
- highly efficient
- synergistic effects in combination with polyphosphates
- excellent storage stability

Recommended concentrations

0.2 – 1.0 % on the total formulation

Dosage of Dispex® AA 4030 depends on the nature of the solids to be dispersed. In critical formulations it is possible to increase the dosage up to 2%.

Storage

Dispex® AA 4030 should be stored in tightly closed containers and in a cool place. Store protected against freezing.

Dispex® AA 4030 must not be allowed to come into contact with metals or alloys that are liable to corrosion.

Validity

This Technical Data Sheet is valid for all versions of the Dispex® AA 4030.

Safety

When handling this product, please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

Note

The data contained in this publication are based on our current knowledge and experience. In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; neither do these data imply any guarantee of certain properties, nor the suitability of the product for a specific purpose.
