

Technical Information Bulletin

Headline AMP[®] Fungicide Tassel Application in Corn

Twelve University studies show an average response to Headline AMP fungicide of 14.4 bu/acre

- Studies were conducted in eastern Colorado, western Nebraska, Wyoming and northern New Mexico
- All were dry environments with minimal visual disease pressure
- All studies included six replications

Best Use Recommendations

- Use Rate: 10 fl oz/A
- Aerial: ≥ 2 GPA
- Ground: ≥ 10 GPA
- 20-day PHI for field and popcorn grain
- 7-day PHI for seed and sweet corn

Timing

- VT (full tassel) - R3 (milk)
- VT stage begins when the last branch of the tassel is completely visible outside the whorl

Headline AMP Fungicide Increases Corn Yield

2011-2013 replicated University studies. Average of 12 studies. **Locations:** Fort Collins, CO; Bethune, CO; Scottsbluff, NE; Lingle, WY; Farmington, NM. **Universities:** Colorado State University, University of Nebraska-Lincoln, University of Wyoming, New Mexico State University.
