

# FoamStar® ST 2445

Defoamer effective in high gloss paints & coatings based on acrylic, styrene acrylic and vinyl acrylic latex

## Application:

**FoamStar ST 2445** is a defoaming molecule that is effective in very difficult-to-defoam gloss formulations.

## Sustainability Highlights:

- Low Odor
- APEO-Free
- Low VOC

## Performance Highlights:

- Fast bubble-break versus conventional defoamers
- Effective in difficult to defoam high gloss formulations
- Very good persistence
- Effective against micro-foam
- Effective in low to zero-VOC coatings

## Characteristic Values:

	FoamStar ST 2445
Appearance:	Yellow liquid
Viscosity:	~ 600 – 800 cps
Density:	~ 8.2 – 8.8 lbs/gal
Active substance:	100%
