

Loxanol® CA 5140

Highly efficient coalescing agent for interior/exterior architectural water-based paints

Application:

Loxanol CA 5140 is a sustainable coalescing agent, that is very effective in reducing the minimum film-forming temperature. Furthermore, it improves open time and adhesion

Sustainability Highlights:

- Renewable content
- Favorable tox profile
- Highly efficient
- Near 0 VOC

Performance Highlights:

- Improved open time and adhesion
- Sustainable coalescing agent
- Reduced minimum film-forming temperature
- Excellent coalescing solvent
- Low odor
- No VOC according to 1999/13/EU and 2004/42/EU
- Benign tox profile, readily biodegradable
- Based on renewable raw materials

Characteristics Values:

Loxanol CA 5140	
Appearance:	Liquid
Density:	~ 0.88 g/cm ³
Flash Point:	~ 176.7 °C
Color:	< 4
