

Raptor®

Herbicide

Weed Management in Alfalfa

Newly Seeded Alfalfa

Herbicide and Rate

Raptor® Herbicide @ 5 oz./A
+ NIS @ 1 qt./100 gallons
+ AMS @ 12–15 lb./100 gallons

Comments

- For best results, use at least 20 GPA for best coverage.
- Weeds: 2–4 inches tall.
- Apply to newly seeded alfalfa with at least two fully expanded trifoliates.
- Pre-harvest interval=0 days.

Established Alfalfa

Herbicide and Rate

Raptor Herbicide @ 5–6 oz./A
+ COC or MSO @ 1 gal./100 gallons
+ AMS @ 12–15 lb./100 gallons

Comments

- For best results, use at least 20 GPA for best coverage.
- Weeds: 2–4 inches tall.
- Apply before alfalfa has 3" of re-growth to insure adequate coverage on weeds.
- Pre-harvest interval=0 days.

Tough Grasses in Newly Seeded or Established Alfalfa

Herbicide and Rate

Raptor Herbicide @ 5 oz./A
+ Poast Plus® Herbicide @ 1.5 pt./A
+ COC @ 1 gal./100 gallons
+ AMS @ 12–15 lb./100 gallons

Comments

- For best results, use at least 20 GPA for best coverage.
- Weeds: 2–4 inches tall.
- Apply before alfalfa has 3" of re-growth to insure adequate coverage on weeds or to newly seeded alfalfa with at least two fully expanded trifoliates.
- Pre-harvest interval=7 days for un-dried hay or 14 days for dried hay.

Always read and follow label directions.
