

Attagel[®] 50

Attagel 50 is an inert powdered gelling grade of attapulgate. It is finely pulverized to effectively form colloidal gels in ionic and non-ionic aqueous solutions to provide thixotropic thickening and suspension.

Chemical Composition

(Mg,Al)₅Si₈O₂₀·4H₂O

Properties

Typical Properties

pH (DI Water)		9.8
Bulk Density (loose)	lbs/ft ³	25
	kg/m ³	400
Specific gravity		2.4
Brookfield viscosity	cps	700

Physical data

Average particle size (Dry Powder)	microns	9
Alpine, +100	%	0.001
Residue, +325	%	0.015
Free moisture	%	14.0
(@ 220 °F, as produced)		
Volatile matter	%	10
(@ 1200 °F, moisture free basis)		
Color		light cream
Physical form		highly pulverized powder

The above typical properties are for general information only and should not be used for specification purposes. Performance characteristics vary depending on specific application. All products should be tested in customer's formulation prior to use. This information is subject to change at any time.

Applications

Attagel 50 is used in the following applications:

- Paints & Coatings
- Chemical Suspension
- Construction
- Ag Suspension – Suspension Conc. Liquid Feed & Suspension Fertilizer
- Adhesives & Sealants

Attagel 50 is recommended for use in paint and coatings applications where sag resistance, spatter control, and syneresis control is required. In most organic liquid systems, Attagel 50 can impart thickening and suspension when dispersed with an appropriate surfactant. It is also used in agriculture suspension products for suspending the active formulation ingredients.

Safety

General

BASF recommends that you take the appropriate safety precautions when handling this product as you should when handling all chemicals. These include the measures described in Federal, State

and Local health and safety regulations, thorough ventilation of the workplace, good skin care and wearing of protective goggles.

Safety Data Sheet

All safety information is provided in the Safety Data Sheets for Attagel 50.
