

Hydropalat® WE 3485

Product description Wetting agent

Key benefits

- Excellent wetting agent for aqueous formulations
- Strong reduction of surface tension
- Highly dynamic substrate wetting
- Contains no flammable co-solvent

Chemical nature Anionic compound

Properties

Physical form Viscous liquid

Technical data

(not supply specification)

Solid content	(115 °C, 2h)	84.0 – 86.0 %
pH value	(1 %)	5.5 – 7.5
Sodium sulphate content		≤ 1.0 %
2-ethylhexanol		< 0.5 %

Application

Hydropalat® WE 3485 is a highly dynamic wetting agent for aqueous coatings, printing inks, over print varnishes and related systems. Due to its excellent wetting properties it is particularly suitable for difficult-to-wet substrates such as plastics and metal surfaces, cellulose film, aluminum and plastic foils, silicone treated papers or glass.

Hydropalat® WE 3485 can be used to optimize the compatibility (color acceptance) of aqueous pigment concentrates in different coatings. It can be incorporated either into the pigment concentrate or directly into the base paint. It can also be used as "post additive".

Recommended concentrations

0.1 – 1.0 % active substance on finished coatings

1.0 – 5.0 % in over print varnishes (OPV)

1.0 – 5.0 % in pigment concentrates

The exact dosage should be determined by appropriate tests.

Hydropalat® WE 3485 may be incorporated at any stage of the manufacturing process. To ensure optimal incorporation it is advisable to add it after grinding by stirring vigorously

Storage

Hydropalat® WE 3485 should be stored in a cool dry place.

Validity

This Technical Data Sheet is valid for all versions of the Hydropalat® WE 3485.

Safety

When handling this product, please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

Note

The data contained in this publication are based on our current knowledge and experience. In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; neither do these data imply any guarantee of certain properties, nor the suitability of the product for a specific purpose.
