

Priaxor®

Xemium® Brand Fungicide

Brandt Smart Trio®

Priaxor® Pre-Tassel Application: Control Early Season Diseases, Maximize Photosynthesis, and Minimize Stress for Optimum Vegetative Growth

Benefits of Priaxor Fungicide

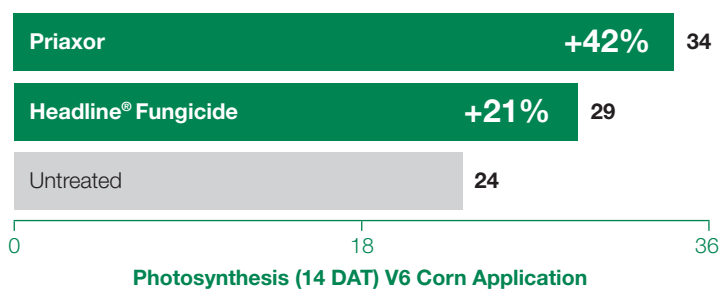

- Longest lasting protection
- Advanced plant health
- 3rd mode of action when used in a sequential program with Headline AMP®

Benefits of Brandt Smart Trio® micronutrients

- Proprietary delivery system gets more nutrients to plants faster, for better plant health and yield
- Reduces stress from post-emergent herbicides
- Zinc, Manganese and Boron enhance seed set, pollination, tasseling, kernel production and ear fill
- Tank mix compatible with Priaxor and Fastac™

Control early season diseases, maximize photosynthesis and minimize stress for optimum vegetative growth.

Enhanced Photosynthesis with Pre-tassel Applications of Priaxor

2011, Seymour Research Station

Priaxor® Best Use Recommendations

Labeled Crops

- Corn—all types

Rates and Recommendations

Use Rate: 4 fl oz/A

Maximum Applications: 2

General Guidelines

- Do not include adjuvants between V8 and VT corn

Diseases Controlled

- Early season disease control (eg., anthracnose) and Plant Health (growth efficiency and stress tolerance)

Brandt Smart Trio® Best Use Recommendations

Rates and Recommendations

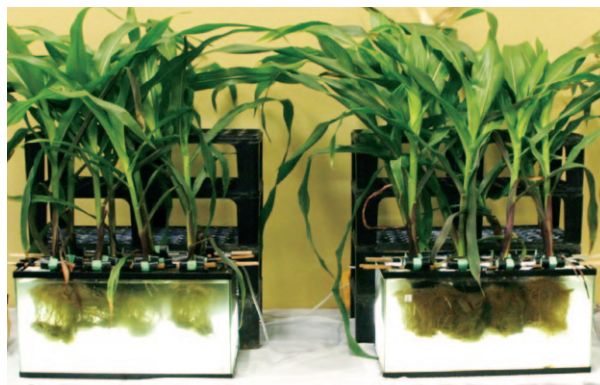

Use Rate: 1–2 quarts/A

Ground Applications: The recommended carrier volume is 10–20 gpa

General Guidelines

- More frequent applications at 2 quarts per acre may be needed to correct deficiencies once they occur
- Do not add liquid fertilizers containing phosphates

Priaxor Plant Health Demonstration

Untreated

Priaxor

- Enhanced root development
- Larger diameter stalks
- Taller plants same stage: V9

Corn plants grown in Purdue University greenhouse. Priaxor applied to V4 corn and transferred to hydroponic solution at V7 corn.
