

FoamStar® ED 2524

Product description Highly compatible and very effective defoamer in emulsion form

- Key benefits**
- Defoamer for a broad range of coatings, such as roller- and curtain coater as well as brush applications.
 - Excellent efficiency to prevent micro foam.
 - Broad compatibility in various waterborne systems.
 - Easy handling and easy incorporation.
 - Shows excellent long-term defoaming persistency.

Chemical nature Aqueous emulsion of organo-modified silicones

Properties

Physical form White emulsion

Technical data (not supply specification)	Solid Content		~ 27 %
	Density (at 25°C)	ISO 2811-1	~ 0.98 g/cm³
	pH value (as is)	ISO 976	6.5 - 8.5
	Appearance	White viscous emulsion	

Application

FoamStar® ED 2524 is a highly effective defoamer for a broad range of aqueous coating applications, pigmented systems. Due to its excellent compatibility, it is highly suitable for clear varnishes. FoamStar® ED 2524 also provides excellent foam knock-down and elimination of micro foam.

FoamStar® ED 2524 is an aqueous emulsion of organo-modified silicones. It is easy to handle and easy to incorporate with sufficient mixing equipment.

Due to its excellent balance between compatibility and efficiency, it can also be used in roller- or curtain coater applications.

Formulation guideline 0.1 – 1.5 % calculated on total formulation is recommended for effective deaeration/defoaming.
FoamStar® ED 2524 is easy to incorporate with sufficient mixing equipment.

Storage

FoamStar® ED 2524 should be stored in tightly closed containers and in a cool place.

Protect from temperatures below: 5 °C. Protect from temperatures above: 35 °C

Before use, mix briefly with low shear forces.

Validity

This Technical Data Sheet is valid for all versions of the FoamStar® ED 2524

Safety

When handling this product, please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.
