

# Facet® L

Herbicide

## Facet® L Herbicide— Now for Sorghum

The new Facet L herbicide provides effective and flexible control of tough grass and broadleaf weed problems in rice and sorghum.

- New, innovative liquid formulation
- Improved efficacy and consistency
- Improved handling, mixing, and tank mix compatibility
- Flexibility, with a wide application window
- Two sites of action for resistance management

### Facet L Use Recommendations

#### Labeled Crop List

- Rice
- Sorghum

**Use Rate:** 22 - 43 fl oz/acre, dependent on crop, soil type, and weeds targeted.

## General Information

- Facet L<sup>®</sup> herbicide is driven by a unique molecule quinclorac which control susceptible weeds with two different mechanisms of action.
  - Facet L herbicide controls broadleaf weeds through auxin mimicry [group 4(O)],
  - while simultaneously controlling grasses through inhibition of cellulose biosynthesis [group 21(L)].
- Facet L herbicide is also systemic and is absorbed through both the foliage and roots of susceptible weeds.
  - Symptoms include stunting, twisting, chlorosis, and reddening of plant tissues.

### Comparable Rates

Facet 75 DF / Paramount <sup>®</sup> DF oz per Acre	Facet 1.5 L fl oz per Acre
5.3	21
6.4	26
7	28
8	32
10.7	43

### Sorghum

Facet L herbicide can be applied pre-plant (22 fl oz/acre) or as a postemergence application to up to 12 inch tall sorghum (22 to 32 fl oz/acre). Facet L herbicide also tank mixes well with other sorghum herbicides and is recommended in mixtures with 2,4-D, atrazine, and Clarity<sup>®</sup> herbicide just to name a few.

**Key Weeds Suppressed or Controlled:** Morningglory spp., eclipta, hemp sesbania, prickly lettuce, dandelion, hedge and field bindweed, giant and common ragweed, wild sunflower, velvetleaf, kochia, foxtail spp, large crabgrass, broadleaf signalgrass, and barnyardgrass.

**Use Rates:** Pre-plant (22 fl oz/acre) or as a postemergence application to up to 12 inch tall sorghum (22 to 32 fl oz/acre).

### Rice

Facet L herbicide controls several key grass and broadleaf weeds whether applied to the soil or foliage of dry-seeded, water-seeded, and Clearfield<sup>®</sup> rice plantings at rates between 22 to 43 fl oz/acre.

**Key Weeds Suppressed or Controlled:** Barnyardgrass, broad-leaf signalgrass, junglerice, large crabgrass, eclipta, jointvetches, morningglory spp., hemp sesbania, and alligatorweed

**Use Rates:** Soil or foliage of dry-seeded, water-seeded, and Clearfield<sup>®</sup> rice plantings at rates between 22 to 43 fl oz/acre.
