

Technical Statement**Handling recommendation for 25kg plastic drums of DL-alpha-Tocopherol**

DL-alpha-Tocopherol

PRD: 30054571, ART: 55434224 (25kg)

We hereby would like to give you a handling recommendation for the 25kg plastic drum article of above-mentioned product. Stored in its unopened original packaging at temperatures not above 25°C, the product is stable for at least 36 months.

DL-alpha-Tocopherol is sensitive to light, heat and oxygen (turning dark) and needs to be stored in a light-proof and airtight container.

Storage recommendations after opening of the packaging:

- The product should be stored in a dry and clean place without direct exposure to sun light.
- It is important to prevent any contamination of the product.
- The headspace of the partially used packaging should be overlaid with an inert gas (e.g., argon) and packed tightly closed after each usage. To make sure that the product does not get contaminated while inerting, the gas tube should not have direct product contact.
- It is recommended to use up the remaining contents as fast as possible – at least within a few weeks.
- The drums can be reclosed with a press-on lid as can be seen in picture 1.
