

# Prowl® H2O

Herbicide

## Prowl® H2O Herbicide for Alfalfa Production

### High Plains

#### Benefits of Prowl H2O Herbicide

- Excellent residual broadleaf and grass weed control
- Yield protection from weed competition
- Improved alfalfa hay quality resulting from control of weed contaminants
- Provides residual control glyphosate and HPPD resistant palmer amaranth

---

Prowl H2O herbicide combines a unique site-of-action with microencapsulation that easily washes off residue.

---

#### Best Use Recommendations

##### Application and Incorporation

- For best results apply by ground in 10–15 gpa or by chemigation in a minimum of 0.5–0.6" total water volume on coarse soils and 0.6–0.75" on medium to fine soils. Can also be applied by air.
- Prowl H2O herbicide will provide the most effective weed control when incorporated with rainfall or overhead irrigation prior to weed germination.

##### Pre-harvest Interval

- 28 days with 2.1 qt/A or less and 50 days with rates greater than 2.1 qt/A.

Technical Information Bulletin

 **BASF**  
The Chemical Company

## Timing and Use Rates

- Apply 1.1 to 2.1 pts/A to seeding alfalfa after the 2nd trifoliate growth stage.
- Apply 1.1 to 4.2 qts/A to established alfalfa in the fall after last cutting, during dormancy, in the spring prior to 6 inch regrowth or between cuttings prior to 6 inches of re-growth.
- Maximum seasonal use rate of 4.2 qts.

Note: Follow crop restrictions apply with rates above 4.2 pts/A. See label for details. Will not control emerged weeds. If emerged weeds are present, tank mix with a postemergence herbicide for control.

## Weeds Controlled

- |                                  |                             |
|----------------------------------|-----------------------------|
| ■ Barnyardgrass                  | ■ Henbit                    |
| ■ Chickweed, common <sup>1</sup> | ■ Kochia                    |
| ■ Common lambsquarters           | ■ Pigweed species           |
| ■ Dodder <sup>2</sup>            | ■ Puncturevine <sup>1</sup> |
| ■ Foxtail species                | ■ Purslane                  |

<sup>1</sup> Controlled with rates above 4 pt/A

<sup>2</sup> Use highest labeled rate for control

**See label for the complete list of weeds controlled or suppressed.**
