

Sharpen®

Powered by **Kixor®** Herbicide

Fall Weed Control in Winter Wheat

Benefits of Sharpen® Herbicide

- Powered by Kixor® Herbicide Technology
 - Control of the toughest broadleaf weeds
 - Control winter annuals including mustard species, glyphosate resistant marestail & ALS resistant chickweed
- Fast
 - Three to five times faster than 2,4-D ester or glyphosate
- Flexible
 - Broad-spectrum broadleaf weed control
 - Preplant interval flexibility
 - Enables earlier planting

Sharpen herbicide makes burndown simple—manage your fields more effectively and help improve your ROI.

Jagged Chickweed Suppression

Untreated

Sharpen® Herbicide 2 oz

University of Delaware Field Trial
Pre application Oct. 2013, picture Apr. 2014

Best Use Recommendations

Wheat Application Recommendations

- Sharpen herbicide (1-4 fl oz/A) + glyphosate

Application Timing*

- Preplant
- Preemergence

* Sharpen herbicide must be applied prior to crop emergence or severe injury will occur

Application Requirements

- Adjuvant: MSO (1 gal/100 gals or minimum 1 pint/A) + AMS (8.5 to 17 lbs/100 gal)
- 15 gpa carrier volume recommended for optimum burndown performance
- Rainfast in 1 hour
