Application

FoamStar® SI 2210 is characterized by a spontaneous defoaming effect in low- and non-pigmented aqueous coatings. It is highly compatible, does not separate out from the paint and has a good long-term efficiency. Aqueous wood coatings and overprint varnishes based on acrylic polymers are the preferred fields of application, but the defoamer is also suitable for adhesives.

Recommended concentrations

A dosage of 0.1 – 0.5 % calculated on total formulation is recommended for effective defoaming.

Storage

FoamStar® SI 2210 should always be stored in tightly closed containers.
Store in a cool place.
