Special hazards arising from the substance or mixture

Hazards during fire-fighting:

Flammable liquid Cool endangered containers with water-spray. See SDS section 7 - Handling and storage.

Advice for fire-fighters

Protective equipment for fire-fighting:

Firefighters should be equipped with self-contained breathing apparatus and turn-out gear. Special protective equipment for firefighters

Further information:

Vapours are heavier than air and may accumulate in low areas and travel a considerable distance up to the source of ignition. If exposed to fire, keep containers cool by spraying with water. Flash fire may occur. Do not flood burning material with water due to potential spreading of fire.

Impact Sensitivity:

Remarks: Based on the chemical structure there is no shock-sensitivity.

6. Accidental release measures

Further accidental release measures:

High risk of slipping due to leakage/spillage of product.

Release of substance/product can cause fire or explosion. Shut off or stop source of leak. Shut off or stop released substance/product under safe conditions.

Pack in tightly closed containers for disposal.

Personal precautions, protective equipment and emergency procedures

No special precautions necessary. Extinguish sources of ignition nearby and downwind. Wear suitable personal protective clothing and equipment. Use antistatic tools. Avoid contact with skin and eyes. Ensure adequate ventilation.

Environmental precautions

Do not discharge into drains/surface waters/groundwater. In case of release into waterways, immediately notify the appropriate authorities downstream of the spill so they can determine if further action is needed.

Methods and material for containment and cleaning up

For residues: Rinse away with water.

Spills should be contained, solidified, and placed in suitable containers for disposal.

7. Handling and Storage

Precautions for safe handling

Ensure adequate ventilation. Do not apply to hot surfaces. Proper ventilation and respiratory protection is required when sanding, flame cutting, welding or brazing coated surfaces. Do not puncture, drop, or slide containers. Containers under pressure should be opened with care to release pressure.

Protection against fire and explosion:

Safety Data Sheet

BUTYLGLYCOL

Revision date: 2025/06/27

Version: 11.0

Page: 5/13

(30034845/SDS_GEN_US/EN)

Use antistatic tools. Exhaust fans should be explosion proof. Provide adequate ventilation to remove solvent vapors from lower levels or work areas and to prevent solvent contact with ignition sources. Sealed containers should be protected against heat as this results in pressure build-up. Avoid all sources of ignition: heat, sparks, open flame. Ground conductive equipment properly to prevent electrostatic discharge. Electrical handling equipment should be explosion-proof.

Conditions for safe storage, including any incompatibilities

Store well away from other substances.

Further information on storage conditions: Avoid extreme heat. Keep away from sources of ignition - No smoking. Keep container tightly closed. Protect from direct sunlight.

Storage stability:

Storage temperature: $\leq 35^{\circ}\text{C}$

The stability data given is only valid when stored under oxygen free inert gases or in containers that are impermeable to oxygen.

8. Exposure Controls/Personal Protection

Components with occupational exposure limits

2-butoxyethanol	ACGIH, US:	TWA value 20 ppm ;
	OSHA Z1:	PEL 50 ppm 240 mg/m ³ ;
	OSHA Z1:	Skin Designation ; The substance can be absorbed through the skin.
	NIO ID, US:	IDLH 700 ppm ; IDLH values based on the 1994 Revised Criteria
	NIO ID, US:	LEL 1.1 % ;

Advice on system design:

Provide local exhaust ventilation to maintain recommended P.E.L. Provide local exhaust ventilation to control vapours. Exhaust fans should be explosion proof.

Personal protective equipment

Respiratory protection:

Wear a NIOSH-certified (or equivalent) organic vapour/particulate respirator. Do not exceed the maximum use concentration for the respirator facepiece/cartridge combination. Observe OSHA regulations for respirator use (29 CFR 1910.134).

Hand protection:

Chemical resistant protective gloves, Consult with glove manufacturer for testing data.

Eye protection:

Tightly fitting safety goggles (chemical goggles). Wear face shield if splashing hazard exists.

Body protection:

Body protection must be chosen depending on activity and possible exposure, e.g. head protection, apron, protective boots, chemical-protection suit.

General safety and hygiene measures:

Work place should be equipped with a shower and an eye wash. Handle in accordance with good industrial hygiene and safety practice. When using, do not eat, drink or smoke.
