

FoamStar® SI 2210 NC

Very effective defoamer based on modified Polysiloxanes with good compatibility

Application:

FoamStar SI 2210 NC is a very effective silicone based defoamer for glossy paints based on pure acrylic binders or alkyd emulsions. Excellent results can be achieved in spray coating applications as well as in higher shear processes and as grind defoamer for applications, where a good compatibility is required. Additionally, the product is also well suited for clear coats

Sustainability Highlights:

- APEO-free
- Low VOC
- Low odor
- Food contact compliance

Performance Highlights:

- Excellent compatibility for high gloss applications
- Easy handling due to low viscosity
- Excellent long term efficiency

Characteristic Values:

	FoamStar SI 2210 NC
Appearance	Colorless to slightly hazy liquid
Density at 20°C	0.95 g/cm3
Viscosity	75 mPa s
Solids	~ 100%
