

# Efka<sup>®</sup> PX 4787

## Product description

Efka<sup>®</sup> PX 4787 is a high molecular weight dispersing agent designed to disperse and stabilize organic pigments and carbon-blacks. Use of Efka<sup>®</sup> PX 4787 results in significantly lower pigment paste viscosity without having to use high level of dispersant. Efka<sup>®</sup> PX 4787 is suitable for industrial and automotive coatings, especially where resin-matrix reactive dispersant is desired.

## Key benefits

- Exponentially lower pigment paste viscosity at lower addition levels
- Relatively consistent and stable viscosity over wide addition range
- Cross-linkable with -NCO and melamine-based resin matrices for optimal durability
- Exceptional jetness for carbon black pigments
- Excellent gloss development
- Highest available transparency in CAB-containing systems

## Chemical nature

Polymer with pigment-affinic groups

---

## Properties

### Physical form

Brownish liquid

### Technical data

(not supply specification)

Solvent	Butyl acetate
Active ingredients	~ 70 %
Amine value	~ 15 mg KOH/g
Viscosity	~ 1,000 mPa.s

\* To comply with US EPA requirements currently, Efka PX 4787 is recommended for use in automotive coatings only in the US.

## Application

Efka® PX 4787 is highly efficient dispersant for Resin-Free Pigment Concentrates (RFPC) to be used in a wide range of solvent-based industrial and automotive coatings.

Efka® PX 4787 can also be used in single dispersant based direct grinding of pigments or as a part of Resin-Containing Pigment Concentrates (RCPC).

## Formulation guideline

An example formulation for resin-free pigment concentrates (RFPC):

The following starting point dry-over-dry addition levels, based on pigment loading, are recommended for pigment concentrates. For optimum results, a ladder study should be performed in the specific binder formulations.

Inorganic pigments	10–15 % on oil absorption value
Organic pigments (green, blue, violet)	15–30 % on BET value
Organic pigments (yellow, orange, red)	15–45 % on BET value
Carbon blacks (LCF)	15–20 % on DBP value
Carbon blacks (HCC)	40–50 % on DBP value

## Storage

Efka® PX 4787 should be stored in a dry and cool place.

**Validity**

This Technical Data Sheet is valid for all versions of the Efka® PX 4787.

**Safety**

When handling this product, please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.
