

# Dispex® AA 4135 NA

A polymeric dispersing agent based on acrylic acid sodium salt in water

## Application:

- Dispex AA 4135 is an effective polymeric dispersing agent for inorganic fillers and pigments. It can be used as supplied or based on acrylic acid sodium salt.
- Recommend for sealants, construction, mastic tile and flooring adhesives, furthermore for mastic water proofing and roof coating formulations.

## Sustainability Highlights:

- Biocide Free
- Low VOC content
- Low odor
- Non-APEO

## Performance Highlights:

- Excellent dispersing efficiency for inorganic pigments and extenders
- Broad application range
- Highly efficient
- Synergistic effects in combination with polyphosphates
- Excellent storage stability

## Characteristics Values:

	Dispex AA 4135 NA
Appearance:	liquid
viscosity (23°C, 100 1/s):	~ 200 mPa s
pH Value:	~7
Solid content:	~ 35%
