

Acronal® 5041

High-performance basis for various applications

The perfect basis for everything

- **Acronal® 5041** is a silanized, styrene acrylic dispersion for ready-to-use applications with low emissions.
- It shows especially high performance in primer, offering excellent adhesion to various substrates.
- With **Acronal® 5041** you are choosing the perfect basis for various applications.

Acronal® 5041

Acronal® 5041 is a silanized high-performance dispersion for primers with low-emission profile

Viscosity (mPas) ²	40 - 300
Solids content (%) ¹	51 - 53
pH value ³	7.2 - 8.0

- Excellent water resistance
- Good adhesion on various substrates & fast drying
- High-degree of pigment binding power
- Low emissions & high wetness stability

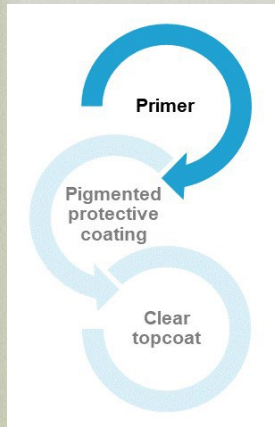

Environmentally-friendly technology:

No use of solvents, ammonia, APEO or formaldehyde

Ready-to-use:

No mixing errors, fast application, safe and easy handling, no cleaning time required, odorless.

We create chemistry
