

Rheovis HS 1184

Rheovis HS 1184 is an associative APEO free HASE rheology modifier with high thickening power for aqueous systems. It is able to promote hydrophobic associations alone or with acrylic binders and other components. The product offers easy incorporation into the formula with both putty and texture suitability

Performance highlights

- APEO Free;
- High Thickening Power;
- Low Water Absorption;
- Highly efficient even at low dosages;
- Increases Antisedimentation and Antisagging Properties.

The graphs show Rheovis HS 1184 consistency and water absorption behavior compared to market alternatives, applied to putty. BASF product presents better results as showed below.
